

Slugs and snails are deterred from crossing **CORRY'S® Slug & Snail Copper Tape** as their slime secretions react with the Copper Tape providing them with a mild, but unpleasant sensation.

INSTRUCTIONS FOR USE:

This product acts as a barrier to movement by slugs and snails. Tear off the paper backing from the Copper Tape. Apply to clean, dry surfaces in areas that are prone to slug and snail infestations such as: greenhouse benches, raised flower beds, flower boxes, trees, vines, potted and container plants. Copper Tape may be nailed to wood surfaces if desired. Do not leave gaps in Copper Tape coverage as these pests may find their way through openings not protected. Do not allow plants or other objects to bridge Copper Tape as slugs and snails may cross. Areas that have been enclosed by the Copper Tape may inadvertently trap these pests. Hand removal or treatment of the enclosed area using baits may be necessary until area is free of slugs and snails.

PRECAUTIONS:

Keep Out of Reach of Children. Copper Tape may contain sharp edges. Keep away from electricity.

A las babosas y a los caracoles se les impide atravesar el **CORRY'S® Slug & Snail Copper Tape** ya que sus secreciones de liga reaccionan con el Copper Tape produciéndoles una suave, pero desagradable sensación.

INSTRUCCIONES:

Este producto actúa como una barrera contra el movimiento de babosas y de caracoles. Arranque el papel posterior del Copper Tape. Aplique en superficies limpias y secas tales como: bancas de invernaderos, lechos de flores elevados, arriates de flores, árboles, enredaderas, plantas en contenedores y macetas que sean propensas a infestaciones de caracoles y de babosas. Si se desea, el Copper Tape se puede clavar a superficies de madera. No deje espacios en la cobertura del Copper Tape ya que estas pestes pueden encontrar el camino a través de aberturas que no estén protegidas. No permita que plantas u otros objetos sirvan como puente con el Copper Tape ya que las babosas y caracoles podrían atravesarlo. Las áreas que han sido encerradas por el Copper Tape pueden, inadvertidamente, atrapar a estas pestes. La eliminación a mano o el tratamiento con cebos del área encerrada, podría ser necesario hasta que el área esté libre de babosas y caracoles.

PRECAUCIONES:

Mantener fuera del alcance de los niños. El Copper Tape puede tener bordes afilados. Mantener alejado de la electricidad.
